

120 MM MORTAR EM-120

The 120 mm Self-Propelled Mortar features a powerful antipersonnel weapon for the engagement of troops in the open or under light cover. The mortar can fire mounted on the base vehicle or from a fixed ground position. A MPM-44M Sight is fitted to provide aiming in elevation and traverse. For operations at night or limited visibility conditions a lighting system is supplied.

TECHNICAL CHARACTERISTIC

Caliber, mm	120
Body length	1 500
Range, m:	7100 maximum / 480 minimum
Rate of fire, rounds/min	up to 15
Elevation angle, deg	from 45 up to 85
Traversing angle, deg:	
- without shifting the bipod	±5
- with bipod shifted	±26
Operation temperature range,	K from 223 to 323
	(°C) (-50° - +50°)
Weight, kg	
- of the mortar in firing position	210
- of the barrel	72,6
- of the carriage-bipod	54,7
- of the support plate	78
- of the sight	0,9
