

# 5.56 X 45MM - M21 SUBMACHINE GUN

Submachine gun M21 is a compact weapon, of light weight and it fulfills all requirements of contemporary combat actions. Reliability of its functioning in various climates and terrains was confirmed by strict testing methods, in accordance with military standards.

It is a gas operated weapon, and locking system is rotating bolt, designed in such a manner that the rifle cannot fire before it is fully locked, which ensures the safety of the shooter.

The barrel is made by cold forging, the interior is chrome plated. This provides long service life and exceptional precision of the weapon.

Good solutions for the ergonomics, with excellent balance of weight provide mild recoil and easy control of fire.

Flash hider masks the position of the shooter.

Materials that are used, handguard and folding stock made of polymer and the finish of metal parts enable easy maintenance.

Type of fire is selected by ambidextrous lever, which has three positions: single shot, burst, safe. Iron sights with tritium tubes provide the possibility of aiming at night.
