

60 MM MORTAR EM-60

The 60 mm Mortar M60MA Long Range is maximum reliability in extra-ordinary conditions and intended:

- to support its own army units using indirect fire;
- to destroy, by curved-trajectory fire, the enemy manpower in open, in light field shelters and trenches, as well as in counter scraps;
- against light armoured targets;
- for creating a smoke screen and terrain illumination.

Having high accuracy and reliability, mighty firing capacity and easy operation and maintenance, as well as suitable for firing different 60 mm Mortar Bombs types, this Mortar is the perfect weapon for different combat operations.

TECHNICAL CHARACTERISTIC

Calibre, mm	60
Barrel length, rnm	1000
Base plate diameter, mm	350
Weight kg	8.6
Elevation range, mils	700-1500
Traverse range, mils	220
Rate of fire, rounds/min	
- with correction of fire direction	6
without correction of fire direction	24
Max range of fire (with HE 60LDMA), m	4060
Max range of fire (with HE 60MA), m	3130
Min range of fire, m	150
Max operating gas pressure, bar	650
