# ELECTRONIC CONTROL TRAINING VEST

C4C100 Electronic Control Training Vest is a new type of training clothing designed for the simulation of electric shock, with the similar appearance as ordinary training vest. Flying probes of stun guns cannot pierce through the vest but electric shock still works on the body. It can effectively achieve the training effect while avoiding the problem of pricking the skin, greatly reducing the psychological burden of trainers caused by stabbing.

## FEATURES

- **Instant Electric Shock:** The vest with flexible conductive material can realize electric shock circuit instantly.
- **Avoid Skin Injury:** A board of thickened PE foam in the middle effectively blocks flying probe from piercing to the skin.
- **Crotch Protection Board:** The crotch protection board is detachable and used In the front or back as needed during shooting training.
- **Easy to wear:** With Velcro for easy wearing and adjusting shoulder and waist tightness.
