Dual-eye Tactical Binocular systems TB-QUAD4 Series

The **TB-QUAD4** the series offers a dual-eye tactical binocular system with innovative fusion capabilities for long range surveillance and reconnaissance. It also includes the option capabilities of being hand-held or tripod-mounted.

TB-QUAD4 is available in three configurations with 50, 75, and 100mm objective lenses paired with matching lenses for the visible channel. Each model provides the optimal ratio of detection distance and situational awareness.

TB-QUAD4-50

TB-QUAD4-75

TB-QUAD4-100

The **TB-QUAD4** operates in 4 distinct modes: Thermal, Daytime, Night and a Day/night/thermal Hybrid view, also known as the Fusion mode. On top of that, the **TB-QUAD4** comes loaded with many unique features that offer convenience and help give the operator a tactical advantage.

What differentiates the TB-QUAD4 is that with the fusion mode you are never left in pitch darkness. All channels complement each other to produce real-time, no-lag video images and unmatched situation awareness. This is achieved by combining detailed images from the visible/near infrared and long-wave infrared spectrum ranges. The end result is a tactical binocular with superb detection and recognition capabilities.

Specifications

	TB-QUAD4-Series
